

Accurate and easy to use multi-function battery tester.

FEATURES

- **Battery 12 V** : test of the voltage and state of charge.
- **Starter 12 V** : test of the start voltage.
- **Alternator 12 V** : test of no-load voltage and charging voltage.

INSTANT ANALYSIS

- Battery voltage (7 V to 15 V)
- Available starting power
- State of charge   

BATTERY TYPES

- Compatible with multiple types of lead-acid batteries from 20 to 150 Ah :
 - Sealed batteries VRLA / GEL / AGM
 - Standard liquid batteries
- **Operating range :**
 -  EN : 185 > 1125 CCA
 -  DIN : 110 > 670 CCA
 -  SAE : 200 > 1200 CCA
 -  IEC : 130 > 790 CCA (international standard)
 - CA/MCA : 240 > 1440 CCA (marine battery)

Supplied in transparent blister packaging

ACCURATE

Advanced dynamic resistance measurement technology minimises battery discharge and displays an accurate result which is unaffected by :

- surface charge
- parasitic load consumers (lights, various indicators, etc)
- contact imperfections (worn out terminals/ lugs, unfastened lugs, etc)

PRACTICAL

- Digital display
- Protection against polarity reversal
- ABS case (acid resistant)
- Power supply : no internal battery required, tester takes its power from the vehicle battery.

		TEST			RESULT		mm	kg
Battery A	Battery V	CHARGING & STARTING SYSTEM VEHICLE						
12 V	20>150 Ah	•	• min 7 V	12 V	1 s	instant	70 x 15 x 120	50 cm 0.25
